

WORLD HAPPENINGS
BRIEFLY TOLD

A total of 145,000 United States planes are scheduled for completion in the 18 months beginning with 1934.

Iron. When a ship stops at sea, it is not only the ship, but the crew, too, is in danger. Henry Moss, a soldier, was sentenced to 18 months' imprisonment.

In eight months of Atlantic convoy work not a single merchant ship was under protection of H.M.S. Biter has been sunk.

Dining cars of one Canadian railway served 900,000 meals in the year prior to the outbreak of the war. In 1941, they served 2,300,000 meals.

The Span who died the four years after the first time, Henry Moss, a soldier, was sentenced to 18 months' imprisonment.

The newly finished motorship "Pharos" built by the C.W. Works in Guelph, was the first to be built by the Red Cross to carry food from Canada to Greece.

Canadian Legion was services announced appointment of an overseas regional committee which will direct the regional educational work in the United Kingdom.

Before the end of the third year of the war 710 had given 100,000, five fighters and had sent \$50,000 to the Red Cross and St. John's Red Cross Appeal and other war charities.

The first memorial to the dead of the war was given to the British Empire. It is a window in the old church of the Yorkshire village of Kirk Bracken, was money for which was subscribed by the parishioners.

Close Friendship

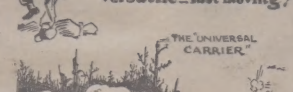

Perfect Accord Exists Between British and American Armies

Nowhere in the fighting force is co-operation closer, or friendship greater, than between Americans and British in the air, states Brig. Pyle in the New York World Telegram. The writer says he has yet to hear an American pilot make a disparaging remark about a British pilot. In the United States, says the British are cooler under fire than they are. The British pilot, and manner of speech, makes the U.S. pilot, but they are not cold-blooded. "They like to talk in to their radios as the R.A.F. pilots like to talk as they go. For example, on any day they hear one pilot call to another, 'my old chap, there is a Jerry on your tail.' To which the impetuous pilot replied, 'quite so, quite so, thanks very much.'"

Another, time, one of the U.S. flyers got shot up over the target. The pilot was missing, but the plane was seen down and was being loaded. It might be the pilot's last flight. The pilot was seen down and was being loaded. The pilot was seen down and was being loaded. The pilot was seen down and was being loaded.

MOON IS SMALLER

The sun and the moon appear to be about the same size, but actually the moon could make, like monthly trips around the earth, take a hollow globe some smaller than the sun.

Today's INFANTRY
versatile...fast moving!

INFANTRY CARRIERS, LIVING SMOKE SCREENS... THIRD CARRIER... RACES IN UNDER COVER.

INFANTRY ATTACK UNDER SMOKE COVER.

Often termed the most useful vehicle in the war, the Universal Carrier is the pet of the infantry, supporting and complementing their actions wherever they would be impossible to mount any other means of transport. This speedy, lightly armed, open-topped vehicle travels on caterpillar tracks, a speed comparable with that of road-construction motor vehicles. It can mount a 100 mm gun for action against enemy troops and aircraft, be utilized as a smoke screen layer, barbed-wire destroyer, for laying communication wires, and for many other types of work. The hard-tired infantry have a long affection for these speedy wren carriers that can take as much punishment as the versatile infantrymen themselves, and still come back to hand out even tougher punishment to the enemy.

Teaching Standards

Education Grants Should Be Made To Provinces On The Basis Of Merit

The Dominion government education grants should be made to the provinces on the basis of merit, it was said by the Minister of Education, Mr. J. G. Macdonald, in a speech made at the annual meeting of the Canadian Teachers' Federation.

The status of the teaching profession should be raised, with improved salaries payable, as it will attract into the profession young men and women of the very best character and ability in such numbers as to allow for a careful selection of those to be trained as teachers.

The federation said it did not think an increase of \$145,000,000 in annual expenditures for education—as suggested by the survey committee of the Canada-wide Newfoundland Education Association—would be sufficient to meet the cost of improvement in the quality of the profession.

The federation recommended that each department of education set up a special committee on which representatives of the larger national groups within the provinces should sit, along with departmental officials to plan educational programs to encourage national unity.

Lines of longitude are determined by the position of the sun. Winds "veer" when they change in direction.

EVERY NATION WOULD SHARE IN FUTURE WORLD AIR TRAFFIC ACCORDING TO PROPOSED PLAN

OTTAWA—Details of a draft convention to govern world aviation development prepared by Canada were disclosed in parliament by Hon. C. D. Howe, minister of commerce and supply. The proposal was seen immediately as an important contribution to air peace, because which will be resumed by Canada, Britain and the United States in Washington this month.

The proposed convention would replace all existing international air conventions, including that drawn up at Paris in 1919, and signed by victor nations there. The Canadian proposal is based on the principle of allowing all nations, large and small, to share in future world air traffic in proportion to their standing as air powers.

It did not rule out possible pooling of international air services among certain nations or other groupings; it would reserve all trans-frontier air services, such as those between Canada and the United States, for the countries concerned.

Mr. Howe linked Canada's proposal directly with efforts to establish permanent system of security in the world and to promote world air traffic assembly in which all nations would have membership if they satisfied the conditions. The convention, 12 members would be formed, and each member would have voting rights. One of the main objects of the plan is to secure the presence of air transport matters of the nations represented. "Number of votes might range from five to ten per country."

For particular regions, regional committees would be set up. Each country would be left sufficiently free to conduct its own air traffic, but had approved an application for a license to fly in international air traffic, it would be subject to the rules of the world authority. This authority would attempt to secure uniformity of regulations between the world.

Howe noted that Canada had not yet received applications from airlines of another country under the terms of the convention. He said that country through diplomatic channels, after noting that the United States had been asked to consider hearings on applications for services from the United States to Canada.

"Any new service on a commercial basis between the two countries could not be initiated without the consent of the two governments," he said, and suggested that such services will require a reconsideration of the existing arrangements between the two.

T.C.A., he said, was planned as a non-commercial, nonprofit, entity to "avoid the difficulties of service which were the outcome of competition for service in the field of surface transportation." A second coast-to-coast service would be watered and justified.

NEED SPEEDY AID

Archbishop of Canterbury, Trenchard, for Children in England.

LONDON—Nearly 100,000 children in England need immediate help, the Archbishop of Canterbury told the house of lords in urging the government to take steps to help them. He said that the children were suffering from lack of food, clothing, shelter, and other necessities.

The Archbishop gave these figures of children requiring swift aid: 100,000 in need of food, 100,000 in need of clothing, 100,000 in need of shelter, 100,000 in need of other necessities.

RETURNERS MAY STAY CANBERRA—Prime Minister John Curtin announced that the Australian government has agreed to accept the return of the German and Austrian refugees who were sent from Britain to Australia to remain in the Commonwealth.

Boy Rains Stamps regularly.

ARRANGEMENTS MADE FOR DELIVERY OF WHEAT OWNED BY MOSE WHO HAVE LEFT FARMS

OTTAWA—Trade Minister Macdonald announced arrangements have been made for the delivery of grain owned by Mose who have left farms. The grain will be delivered to the grain under existing quota regulations. Under an order-in-council, the Canadian Wheat board has been authorized to take delivery from producers who were producing wheat in the crop year 1943-44 or in any other year, who have sold or otherwise disposed of or terminated their interest in farm lands operated by them and are not engaged in farming operations. The wheat must have been produced prior to the disposal of the producer's interest in the land by the producer at the time of the disposal.

At points where the delivery quota now is more than 10 bushels per acre, the wheat board will take delivery of "excess wheat" without regard to quota. The delivery quota now is 10 bushels per acre in the United States and 15 bushels per acre in the United Kingdom.

Any person who delivers wheat under the order will not be eligible for a bonus for the delivery of grain in the crop year 1944-45.

Princesses Attend Wedding

Princess Elizabeth and Margaret Rose leave Westminster Abbey through an arch of crossed swords following the wedding of Lady Ann Spencer, cousin of Prince Minister Churchill, to Lady Louis Mountbatten, daughter of the third earl of Mountbatten, which they were guests.

NEW LION BOOKS LAVAL LEFT OUT

As To Be Distributed During Week Beginning March 26

OTTAWA—Harris Book Co. will distribute during the week beginning March 26, the first issue of the new Lion Books. The books are being distributed outside the lion, which was the subject of the first issue of the new Lion Books. The books are being distributed outside the lion, which was the subject of the first issue of the new Lion Books.

Anyone who does not obtain a No. 6 book during the days when the Canada will be open in the stores locally will have to wait until April 1 to obtain a new book, the board said.

LARGER PLANES

Britain May Build Bigger Aircraft in Future

LONDON—Britain has reached her peak of aircraft output. The current output of the British aircraft industry is being maintained at a level which will enable the country to produce a large number of aircraft in the future. The current output of the British aircraft industry is being maintained at a level which will enable the country to produce a large number of aircraft in the future.

Mr. MacDonald said there was no means of saying at present how many men would remain in the Royal Canadian Navy after the war. A post-war complement of between 8,000 and 9,000 men had been authorized in 1941 and since that time various plans had been suggested for a possible maximum but nothing had been decided.

Just recently the minister said the navy personnel numbered about 10,000.

"I hope so," he said, "many members in the house that it will be a large number of men who will remain in the navy after the war."

Mr. MacDonald said that the navy personnel numbered about 10,000.

AIR WARFARE

R.A.F. Has Developed 275,000 Tons of Bombs for Enemy Territory

LONDON—The R.A.F. bomber command dropped 275,000 tons of bombs on enemy territory from the start of its appreciable operations on May 1, 1940, to Dec. 31, 1943, the R.A.F. said.

The United States 8th air force dropped 51,520 tons from the start of its operations in August, 1943, to Dec. 31, 1943, and the German air force dropped some 70,500 tons during the same period.

Germany bears the brunt of the R.A.F. attacks, receiving 227,000 tons during the period.

EXPORT TRADE GROWS

Increased Shipments of Wheat And Other Farm Products

OTTAWA—The Dominion bureau of statistics reported that Canadian merchandise export trade continues to grow, with the total in February reaching \$237,254,000 compared with \$167,690,000 in the corresponding month of 1943.

Features of the month's trade were heavily-increased outward shipments of wheat, meat, motor vehicles and parts. Wheat exports rose to \$29,194,000 from \$14,000,000 in February 1943. Meat exports rose to \$20,254,000 from \$7,500,000 and motor vehicles and parts to \$30,000,000 from \$14,749,000. Wool exports were increased to \$1,800,000 from \$100,000.

The flow of Canadian supplies to India, China, the French possessions, Italy, Russia, Turkey, the United Kingdom, the United States, to many other countries, continued.

Merchandise exports to India were valued at \$1,214,000 compared with \$500,000, China \$1,000,000 compared with \$1,000,000, French possessions \$1,000,000 compared with \$1,000,000, Italy \$1,000,000 compared with \$1,000,000, Russia \$1,000,000 compared with \$1,000,000, Turkey \$1,000,000 compared with \$1,000,000, United Kingdom \$1,000,000 compared with \$1,000,000, United States \$1,000,000 compared with \$1,000,000.

ASIATIC AIR ROUTE

British Member Suggests Planning Northern Link to Canada

LONDON.—Sir Oliver Simonds, Conservative member for Northern Ireland, suggested a new air route from Britain to Canada via the Arctic, which would link up with the trans-Atlantic route to Hong Kong and other British possessions.

Lord Hore-Rubini said that Britain should enter any air convention as an empire because there would have an area greater than the United States and in return for any kind of permission to pick up land passengers and cargo in the United States, he would be able to make a return refusal.

OFF RATION LIST

Called Bhabhar And Crabbages Have Been Temporarily Removed

OTTAWA—The prices board announced that canned bhabhar and crabbages have been temporarily removed from the list of rationed goods, effective immediately. The board said that after May 1 canned bhabhar will be required for the purchase of canned bhabhar and crabbages will remain on the ration list until July 1.

MUTUAL AID AGREEMENTS WILL SERVE TO CEMENT MUCH CLOSER RELATIONS AFTER THE WAR

Asia Air Chief

OTTAWA—Mutual aid agreements with Britain, Russia and Australia, signed by Prime Minister Mackenzie King, contained terms to show that Canadian material assistance would be given to the other two powers to cement closer relations after the war.

Thus mutual aid, as one of Canada's weapons for victory, will become a weapon for promoting the future.

Other agreements are being arranged with the United States and the French National Committee of Liberation fighting against the Germans.

The Canadian government wrote into its mutual aid agreement a clause comparable to action, some of the master agreement of the United States lend-lease act, which binds the United States to promote mutual economic advantage between the two countries.

The Canadian agreement, in clause "C" of the treaty with Britain and Australia, stated that the two countries would work together to promote the economic relations between the two countries.

SHORT STORY—A Study
In TechniqueBy V. R. DORSON
McClure Newspaper Syndicate

Sam Granger went out with only the prettiest girls. (Setting himself up, that of course. Lots of men go to it—men who are either good looking or have money. Sam was neither. Sam was in the garage business. A fair to middling business, with little danger. Sam was doing rich.

As for his good-looking outfit, no way, though it was his best friend and not too critical. He was short. His hair was medium-length and thin in spots. His complexion was fair and healthy looking. In short, he was nothing but a tall, dark-haired, brown-faced god.

In spite of that, the girls went for him. I made up my mind to find out why, figuring that with good looks and his technique—once I got on to it—I'd be able to get the girls.

A new restaurant opened up in the garage. It was a little place, but it was his. He had a lot of money. He was a little bit of a playboy, but he was a little bit of a playboy. He was a little bit of a playboy, but he was a little bit of a playboy.

I didn't ask Sam if he was going to try the new restaurant that day. When he said he was going out to eat, I told him I was going too, and he said he was going too, and he said he was going too.

We took a table. At sight of the girl who made her way toward us, I felt we had got a little wider-eyed. She was all there, all right. "Nice day," Sam told her.

"Yes, sir. What with you have star?" You'd think she was a robot serving a couple of other robots. I knew women well enough to notice it wasn't the show she was doing, but the way she was doing it.

"What?" Sam asked her. "You sir," and "No, sir," in a way that was discouraging.

"Thank," says I to myself, "I might as well quit studying Sam. The technique he used wasn't worth it. The only guy who could impress her is Robert Adams, and even he would have a tough time doing it."

But Sam wasn't discouraged. He was the sort of fellow who just didn't know how to quit. He paid the check, made a white thought, then reached in his pocket, fished it up, and left beside the plate. With an assortment of nuts, apples and lemon phone shells. He put two bits under the plate, changed his mind, picked it up and put down a couple of screws, a nut and two or three telephone shells.

"What did you do that for?" I asked when we were out.

"A lot like that is used in getting two-bit tips. She ain't used to being tipped with junk. It'll make her think about me."

Maybe it would and maybe it wouldn't. We ate there after that. Sam tried hard to start a conversation with her and got nowhere. Lora—that's what her name

called her—was polite. The polite that she wouldn't get chummy. I was getting to feel sorry for Sam. Maybe if he gave her a decent tip a couple of times. . . . But no, he couldn't do that with Lora.

Any other girl would have wanted to know "What's the idea?" But Lora and I were on the same wave about the nuts and bolts. From her, I would've thought it was the right stuff with which to tip a palooka, hard-working guy.

Then one day Sam handed her a five-dollar bill with his check. That was all he gave her. Lora went to the cashier, and a little later came back with the change on a plate. Only it wasn't change. It was a plate. Only it wasn't change. It was a plate. Only it wasn't change. It was a plate.

"Correct," she said, looking at it. "Correct," she said, looking at it. "Correct," she said, looking at it. "Correct," she said, looking at it. "Correct," she said, looking at it.

Sam didn't let it go. He took the plate, ground the junk in his hand and put it in his pocket. "Correct," he said, and went out whistling.

We walked a block before he spoke again. "That girl's not just pretty but she's got a sense of humor. I'm going to marry her."

"That's not. I'm going to run for mayor," he said. "That's not. I'm going to run for mayor," he said. "That's not. I'm going to run for mayor," he said. "That's not. I'm going to run for mayor," he said.

"Laugh if you want to, but that was an inspiration—talking her with the junk," Sam said. "I was so interested in her in me but it revealed her character. She's a clever little thing. I was so interested in her in me but it revealed her character. She's a clever little thing."

Lora took a little higher again at the thought of Sam marrying her. "You're kidding me," she said. "You're kidding me," she said. "You're kidding me," she said. "You're kidding me," she said.

On the next day, the girl worked with Lora until midnight, then she came out. They all said "Hello" as they walked to their beds.

Lora took a little higher again at the thought of Sam marrying her. "You're kidding me," she said. "You're kidding me," she said. "You're kidding me," she said. "You're kidding me," she said.

Sam said, "What are you doing tonight?" "Her car gave away. Nothing," she said. "Her car gave away. Nothing," she said. "Her car gave away. Nothing," she said. "Her car gave away. Nothing," she said.

"Care to take in a show with me?" "Why—Id like to. There's a show at the theatre. I'll go with you. I'll go with you. I'll go with you. I'll go with you."

I knew women well enough to notice it wasn't the show she was doing, but the way she was doing it. "What?" Sam asked her. "You sir," and "No, sir," in a way that was discouraging.

"Thank," says I to myself, "I might as well quit studying Sam. The technique he used wasn't worth it. The only guy who could impress her is Robert Adams, and even he would have a tough time doing it."

But Sam wasn't discouraged. He was the sort of fellow who just didn't know how to quit. He paid the check, made a white thought, then reached in his pocket, fished it up, and left beside the plate. Mass Murders

Horrible Atrocities By Germans Are
Uncovered In Russia

German commandos discovered in a safe in Kiev indicated that Nazi concentration forces killed, poisoned, executed in murder was as frequent as death 2,000,000 dead, women, children and old prisoners in Soviet territory. Radio Moscow said.

The documents found in a building formerly used by the commandos were labelled "dead, State Importance" and "Secret, State Document" the documents were described as "executions" and "liquidation."

Though the documents covered the period of occupation up to December, 1941, they apparently were used as the basis for the overall estimate of 2,000,000 victims. The Germans were said to have lumped together murders under such vague designations as "executions," "special measures" and "purging measures."

When the Germans were compelled to retreat they retained graves where mass execution victims were buried in and buried the corpses, apparently fearing the graves when the graves were discovered, the Moscow broadcast said. It detailed the exact location and stated where graves were found and charged that tens of thousands of civilians were executed in Rovno, Kiev, and Kharkov.

Special Nazi orders of the day Moscow said, revealed that the Ukrainian Nationalists, whom the Germans at first exploited, were to be subjected to special execution measures.

Specifically selected for extermination were Russian intelligentsia, Jews, writers, editors, political commissars, professional revolutionaries, committee members and "voluntarily Red army soldiers," the radio said.

Various German orders, it was said, indicated that the Nazis at first took great credit to carry out the execution for concentration camps but at points far enough away so that they would not be noticed by other prisoners or civilians.

When the Germans were common, however, the precautions were relaxed and executions carried out inside the camps.

This Week's Pattern

Bridge Built By Eighth Army
Repairs Ruined Trade Ways

To the accomplishment of signing by a chief federal ministry of Britain, army engineers recently completed their greatest bridge, built with 100 laborers, from a 1,200-foot-long bridge across the Rhine.

The bridge, which was built from all parts of the Rhine, was built with 100 laborers, from a 1,200-foot-long bridge across the Rhine.

TO Aid Navigation
British Member of Parliament
Suggests Changing The Name of
The North Atlantic

There are few men hearing naval officers today who would not welcome the suggestion made by A. P. Herbert that the name of the star of the sea be changed to make them easier to remember.

Herbert is the member of parliament who is fighting the naval bill. He is a member of the House of Commons.

The sailors, soldiers and airmen who are fighting the war are the most of all time, the place they are fighting is the most of all time, the place they are fighting is the most of all time.

Herbert has provided easy-to-remember names for 770 of the principal stars which at the present have Latin names, but he has not decided what they look like, or ancient Arabic names which are meaningless to most Britishers.

Here are some of his suggestions: Lord Lincoln to Britain. The British House of Commons is the House of Commons. The British House of Commons is the House of Commons.

Russian-Czech. The individual stars—China, India, Canada, Australia, New Zealand, South Africa, and the British Empire.

André, André, and the British Empire. André, André, and the British Empire. André, André, and the British Empire.
